DETAILED ACTION

Claim Objections

1. Claim 6 is objected to because of the following informalities: Line 33 recites “each *pf* the”. It appears that this should read --each of the--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 5, 11, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Takeda, et al. (US 5,522,269).

A. With respect to Claims 1 and 11, Takeda discloses an angle detection device comprising an angle detector 23 including an excitation coil 6, 7, with the excitation coil arranged on the rotary shaft 2 and supplied with excitation voltage, and a pair of detection coils 9, 10, with each detection coil being arranged near the excitation coil to induce detection voltage when excitation voltage excites the excitation coil, wherein the detection voltages of the pair of detection coils have different phases (column 5, lines 30-56); and, a controller (control unit, Fig. 1) connected to the angle detector 23 for calculating the rotational angle of the excitation coil from the detected voltages induced in the detection coils; wherein the controller includes a correction unit 28, 43 for correcting the amplitude of the excitation voltage to maintain each of the detection voltages at a predetermined value (column 6, line 60 – column 7, line 42).

Art Unit: 2855

B. With respect to Claims 5 and 15, Takeda discloses that the correction unit corrects the present amplitude of the excitation voltage so that excitation current generated by the excitation voltage increases or decreases (column 8, lines 1-43).

C. With respect to Claim 14, Takeda discloses comparing 18, 41 the amplitudes of the detection voltages in accordance with the comparison result.

Allowable Subject Matter

4. Claim 6 is objected to as having a minor informality, but would be allowable if rewritten to correct the informality.

5. Claims 2-4, 12 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
